## Profile

Passionate full-stack developer with hands-on experience in developing scalable applications using a wide range of Front-end, Back-end, and Database technologies like GoLang, VueJs, MongoDB, MySQL, etc. Developed and managed, the low-code application development platform. Looking to further enhance my skills as a future full-stack developer.

## Professional Experience

**Full Stack Developer (Project Trainee),**  
*Maharashtra Knowledge Corporation Limited* ✉  
08/2021 – present | Pune, India

### Key Responsibilities

- Analyze, Estimate, Develop and Design the Architecture of the project and understand the pain areas of the project.
- Contribution to hands-on with the development and collaboration of other members of the team.
- Managed product development from performance, scalability, security, etc. so that it meets the road map, and functional and non-functional requirements.

### Project Work Summary

- Developed the project in GoLang and VueJs for the deployment of simple files or folders to production, taking backup of the code files, and minimizing the human intervention.
- Worked on Configuration management project.
- Developed and managed the next-generation Low-Code application development platform which can create APIs without coding.
- Developed course viewer application in VueJs.
